

Scientific conference

Intervention research: A strategy to reduce cancer burden.

The research chair opsyrii “innovations in psycho-oncology and interventional research” organizes this scientific conference. International invited speakers will present innovative interventions and updates on methodological aspects. The conference is designed to create a dialogue among behavioral/social science researchers, clinicians, patients, caregivers, evaluators, and faculty in psycho-oncology.

Location of the event

ONCOLille Institute
Boulevard du Pr. Jules Leclerc
59000 Lille
